New POS Software Update --- November 2017

- Some problems with 8-digit bar codes have been fixed
- The "speed test" button on the tools page has been replaced with an "HTTP TEST" button. This should bring up a simple page that says the internet is working, or it may bring up the ISP's error page showing the problem with their internet connect (like call for service).

• The register layout has changed a bit to accommodate some new payment types. Eventually, we will allow the payment types to be more flexible and controllable by the merchant.

Here is what the merchant will see when tapping OTHER

When Tapping WIC this is what will happen

As you can see, when aying by WIC all items in the basket are included and all taxes are removed from the sale.

Merchants can now accept 3rd party coupons using the OTHER payment feature.

If the merchant wants to accept a 3rd party coupon (this will not be reimbursed by IDT) the merchant will ring up the product, type the discount amount on the coupon, tap OTHER, and then tap COUPON.

In the images below you will see a step by step to accept a coupon. In the first image we have a sale of \$20.00 General food and we are going to apply a \$2.00 coupon. You will notice it says \$2.00 above the keypad.

- Merchants can now track Lottery Payouts
- Merchants can now also apply Lottery Payouts as forms of payment
 - Example 1 Basic Lottery payout
 - In the image below we are going to pay a customer \$10.00 from the register for their winning Lottery ticket. (Steps taken: type \$10.00 and press Lottery)

Lottery payouts can also be used as a form of payment for the consumer

In this example a consumer is purchasing \$20.00 worth of HOUSEHOLD products. The consumer is also redeeming a winning \$10.00 lottery ticket. In this case the consumer will use the \$10.00 winning ticket as payment towards the \$20.00 sale.
