# POS Software Update --- January 2018

We are going to be releasing a new POS software update very soon. Here are some details about the new features.
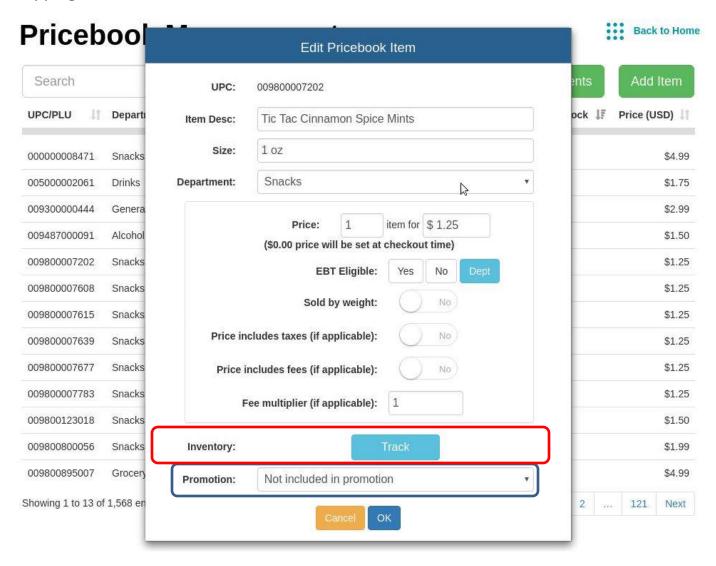

OUR POS CAN NOW SUPPORT EBT REFUNDS

The big development this release comes with regards to the way items in the Pricebook are managed. In the past merchants would need to go from the Pricebook screen, then to inventory, and maybe even to the promotion screen to complete various tasks that all deal with the same item. With this release all of the "Item Management" can now be done from the Pricebook.

The layout on the Pricebook page has changed slightly. We have removed the "EDIT" button. Now the user can tap anywhere on the line to open the details.

Pricebook Management

When tapping on one of the items the user will now see the screen shown below

We have added two new features to the Edit Pricebook Item page. Circled in Blue is the new option to add an item to an existing promotion, or create a new promotion.
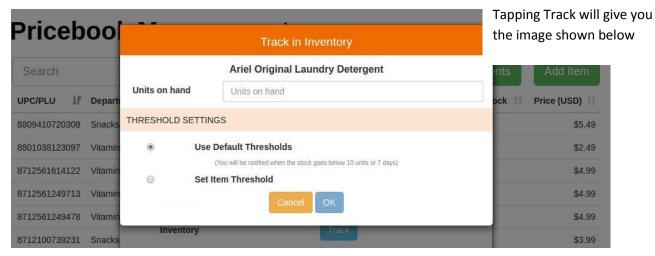

When tapping the Promotion dropdown you will see the image below

Here you can see the options being given when tapping the dropdown menu. If the user chooses *Create New Promotion* the system will bring you into the promotion page and you will follow the steps to create a new promotion.

Merchants now have the ability to track and manage inventory from the same screen. Shown below

Tapping Track will give you the image shown below

At this point the user can enter the number of Units on hand as well as set the Reorder Notification Thresholds. The user can use the default thresholds or Set a specific item threshold. (Shown below)

After tapping OK, the user will see the changes (shown below). At the point press OK and everything will be updated

Edit Pricebook Item
