

THE 3/14/18 VERSION OF SOFTWARE HAS THE FOLLOWING NEW FEATURES & UPDATES:

1) “Other” payment button now includes “Scratch Off”, and the POS now tracks Scratch Off redemptions separately from “Lottery”. Scratch Off payouts will appear in both the store and shift reports.

2) Double-clicking on an item that was weighed, now shows new, real-time scale values and allows replacing the item's prior weight with the updated weight on the scale.

Click on the grey round icon for the new weight to be used, and to have the price recalculated.

3) New permissions were added:

A) There is a new permission controlling access to the Boss Revolution® portal. The new BR Portal permission setting is now, by default, turned OFF to cashiers who do not have a Boss Revolution® sub agent account. If you enable BR Portal access and do not have sub agent accounts set up, in the future, cashiers will have unrestricted direct access to the owner's Boss Revolution® account. Therefore, we recommend now creating a sub agent account for each of your cashiers.

3

B) Inventory permissions for other users: We have a new set of permissions controlling access to inventory information, specifically from **Pricebook**: Viewing inventory levels; adjusting (“EDIT”) inventory levels, adding (“ADD”) new items to be tracked, and removing (“DELETE”) items that are being tracked.

4) Fixed all refund issues that we could find, especially for EBT. Previously reported refund issues, including those for EBT, have been addressed and fixed.

5) Improved inventory error messages.

6) Supports the Dejavoo terminal configuration for integrated processing (See Tools|Store Setup|-Credit Card). We're excited to offer a new alternative for credit card card processing, which is newly integrated with the POS: Swipe, dip or tap; Next business day deposits; Simple, no-hidden-fees pricing; Unlimited EBT Available.

Update

7) Internet Connection for Maintaining Software Access & Support: We have new messages that appear on-screen, notifying them that the POS is not connected to the internet. A high speed internet connection is necessary for updates, service and POS support. These new notifications remind merchants to connect their POS system to the internet, in order to maintain service.
